Enterprise Solutions

Occupational & Sports Health Appointment Platform

Query History

View all queries made within a specific period, with easy and direct access to all activity monitoring.

Management of Clinics and Mobile Units

The ability to control appointments associated with a clinic or mobile units, as well as their location.

Appointments

Management of appointments from scheduling to execution. Control of upcoming appointments, with automated email or SMS alerts. Automatic selection of partners based on location.

SMS and Email Notifications

With just one click, send SMS or Email notifications to workers, supervisors, or partners about scheduled appointments and exams. You can also send reminders and other communications.

Integration with ERP

The possibility of integration with an ERP system for the automatic scheduling of medical appointments and exam, as well as the updating of absences due to illness, vacation, or other types of leave.

Accessibility

Accessible application compatible with inclusive technologies for people with visual impairments.

Power BI Dashboard Integration

Ability to create dashboards with KPIs and integrate them into the application without additional development needed.

Partner Management

Streamlined management of partners, enabling them to update their availability, confirm completed appointments, and generate reports on appointments performed.

Team Management

The ability to create work teams responsible for specific tasks, such as scheduling confirmations, billing control, availability updates, and more.

Management of Unit Calendars

Manage clinic and mobile unit calendars more efficiently, allowing for availability updates. In cases of unavailability, it also enables bulk updates of already scheduled appointments.
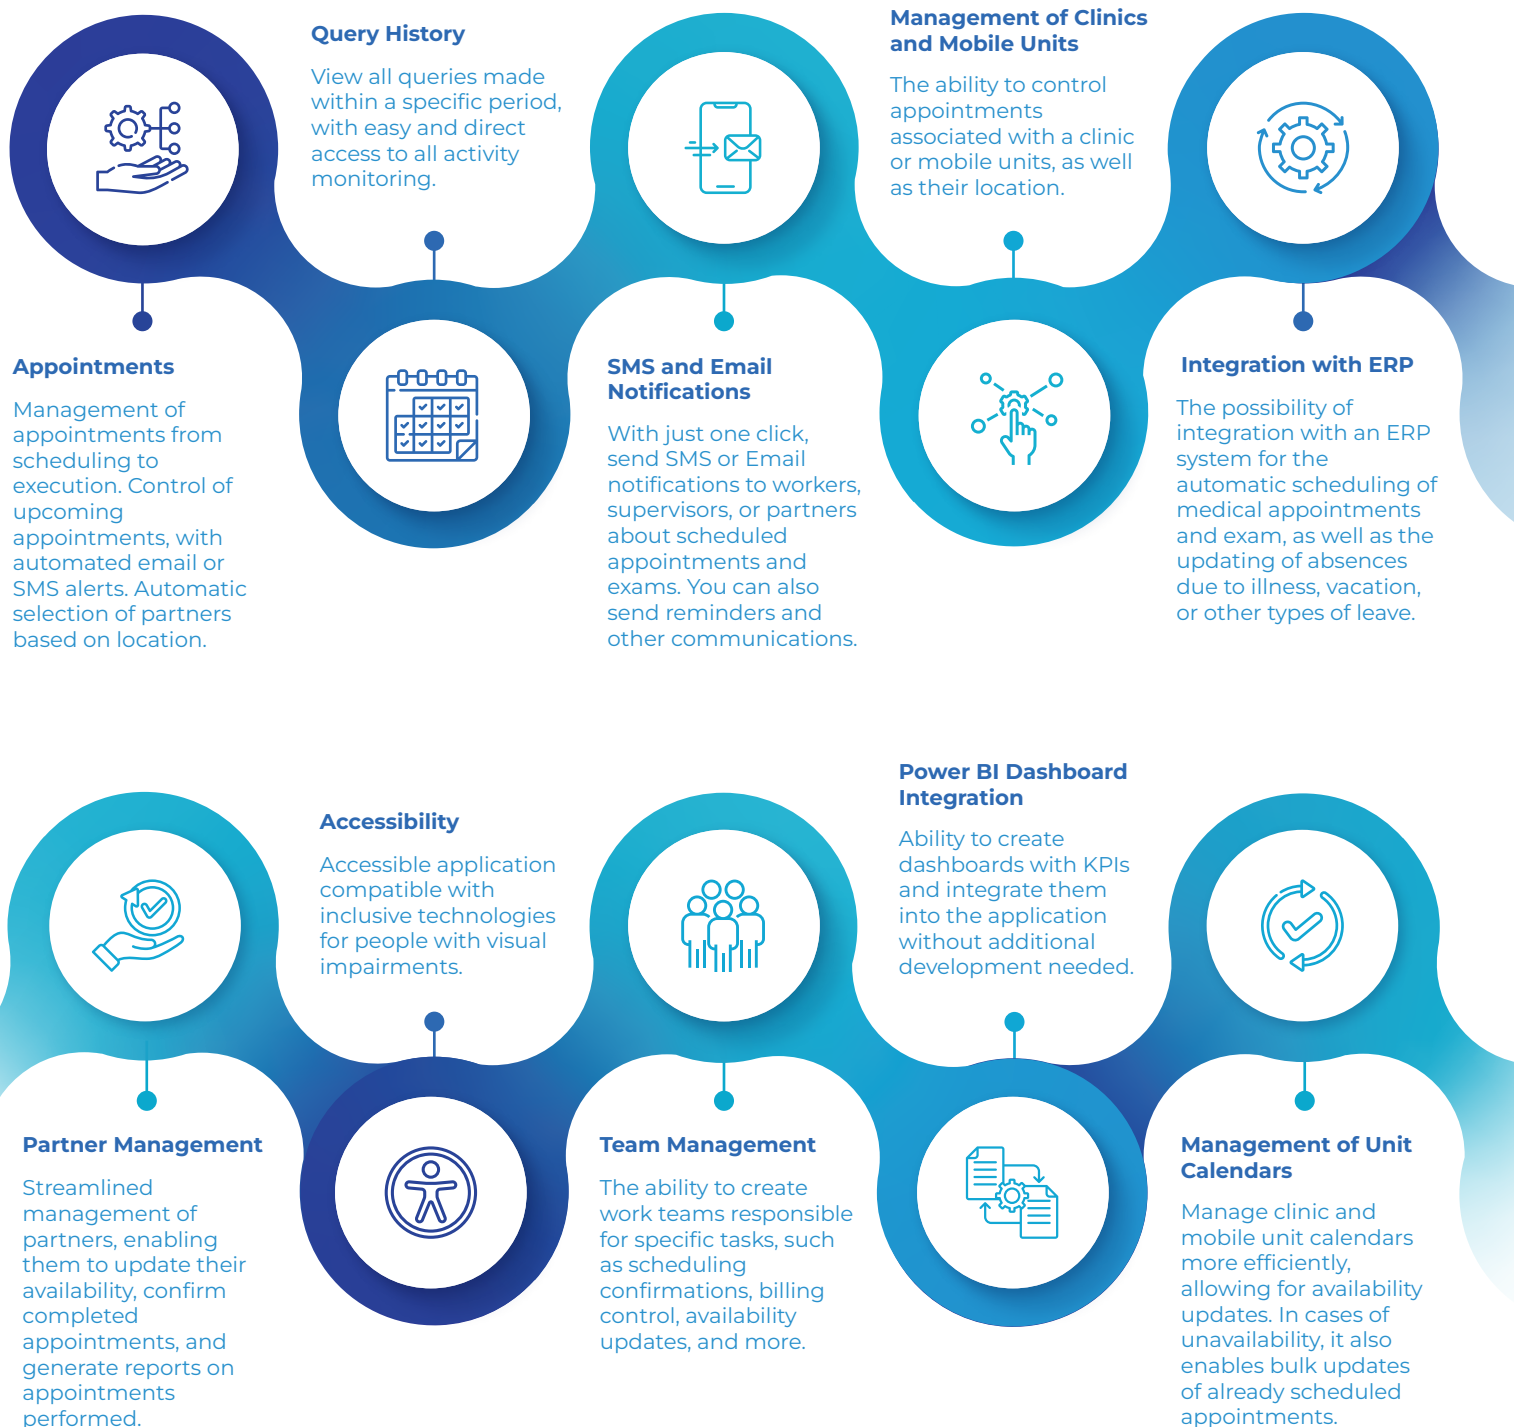

Why Noesis?

Driven by creativity and competitiveness, we build solutions that accelerate our client's digital transformation, ensuring a seamless global business experience across internal and external processes.

Our area of expertise

Our as-a-service delivery model leverages cloud technologies and essential data to provide scalable solutions that focus on digital experience, customer engagement, productivity, and collaboration.

We excel in DXP, e-commerce, CRM, bots, intranets, mobile applications, digital signatures, and adoption platforms. Supported by deep expertise, we provide tailored technical advisory and custom development services to boost efficiency, drive growth, and optimize costs for your organization.
