

# BUILDING SECURITY INTO YOUR ORGANISATION

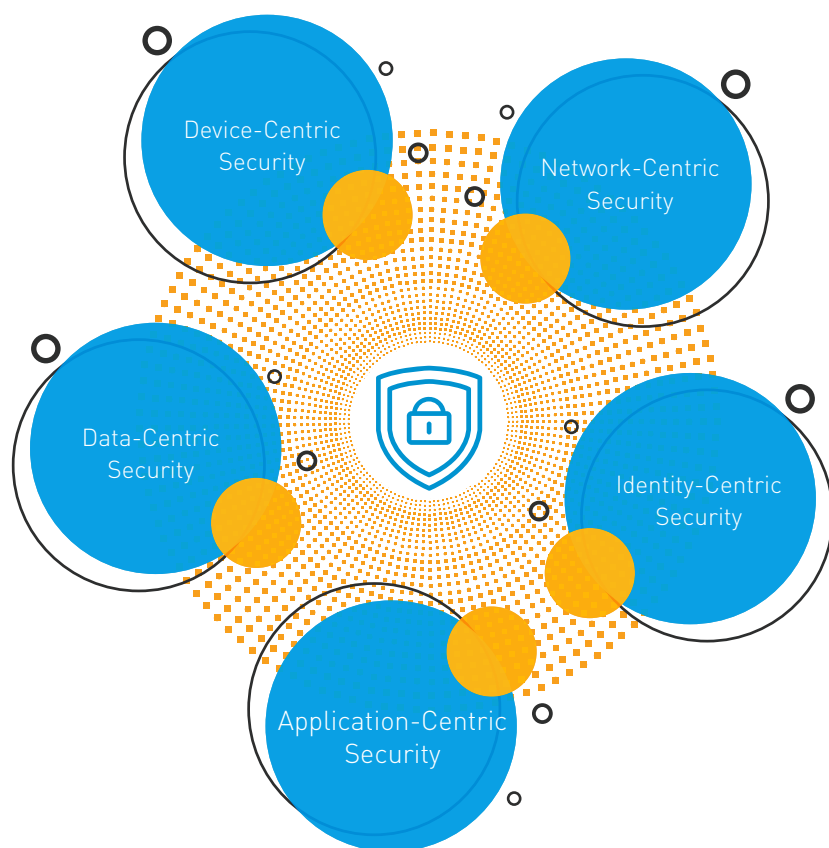

Helping your business  
grow faster

Organisations must build security into every piece of their business from networks to apps, from users to data, and even from devices to IoT. At the same time, visibility is needed to detect and respond to existing and new threats. To prevent business damage is necessary to detect and remediate cyber attacks quickly.

Create a **secure network** keeping in mind your **users, network, applications** and **devices**.

**Optimise your protection and security resources** knowing exactly who has access to what, and why, with our Identity, Authentication and Access Management solutions.

Build full visibility into your organisation to **detect and respond to existing and new threats with Noesis' solutions.**

Keeping your  
complex operations  
secure

Collecting machine  
learning in real-time  
a fast pace

Detect all threat types  
(insider, criminal attacks, data  
exfiltration, IoT hacks, etc)

Prevent data trust  
attacks

Prepare for increased  
intelligence and  
espionage attacks

Eliminate data breaches  
with intelligent  
monitoring

## Partnerships

Focused on delivering cutting-edge solutions,
